## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7 and 21-24, drawn to the method and apparatus of cleaning overspray with negative pressure.

Group II, claim(s) 8-10, drawn to the apparatus of cleaning overspray by brushing or wiping.

Group III, claim(s) 11-13 and 25, drawn to the method and apparatus of cleaning overspray with a cleaning agent comprising cryogenic fluid.

Group IV, claim(s) 14-15 and 26-27, drawn to the method and apparatus of cleaning overspray with a cleaning agent comprising charged particles.

Group V, claim(s) 16-17 and 28-29, drawn to the method and apparatus of cleaning overspray with a positive pressure source in fluid communication with an external housing to direct air from within housing outward through a porous material.

Group VI, claim(s) 18-20 and 30, drawn to the method and apparatus of cleaning overspray with a positive pressure source in fluid communication with a flexible material.

Art Unit: 1792

2. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Each group of inventions is drawn to cleaning powder overspray off of a powder spray gun by different cleaning techniques, such as, differing cleaning solution/agents or actions (i.e. suction or brushing).

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
